

RGB switch compatible with: OPTIMA nano / OPTIMA EXPERT / OPTIMA PICO and ALEX IDEA.

The new switch indicates the type of current operating mode: petrol/gas and gas level in the tank. Available in two versions: external and recessed in the dashboard. The housing of the new switch is made of high quality aluminum, which perfectly fits the style of modern interiors.

The RGB switchboard is equipped with colorful SMD RGB LEDs, the color of which can be personalized according to the customer's preferences. It has a built-in buzzer for acoustic signaling. Works according to the parameters set in the OPTIMA diagnostic program. Small housing dimensions and symmetrical shape allow convenient and aesthetic assembly of the switchboard, even in hard-to-reach places.

Functions:

- Display of the current operating mode
- Display of the current gas level in the tank
- Current fuel supply selection
- Informing about a change in fuel supply type and system errors
- Adjusting the volume of sound signals and the backlight intensity
- Emergency car start function on gas

Specification:

- Dedicated to: OPTIMA nano, OPTIMA EXPERT, OPTIMA PICO, IDEA controllers
- Fuel type: LPG, CNG
- Digital control panel
- Personalized SMD RGB backlight
- Buzzer with sound signals
- 4-pin plug connector compatible with OPTIMA and IDEA wiring harnesses

Product code:

PCB-14-00007
PCB-14-00008

Product name:

SWITCH CRGB V1 OPTIMA NANO EXPERT Pico
SWITCH CRGB V2 OPTIMA NANO EXPERT Pico
